

Interoperability Report for MegaRAID Entry 6Gb/s SAS Controllers

**This represents basic compatibility and is only a guide to hardware which is
Known to function with the listed MegaRAID SATA+SAS controllers.**

Updated 02/25/11

Controllers ♦ Motherboards ♦ SAS/SATA Enclosures ♦ Hard Disk Drives ♦ Solid State Drives ♦ Tape Drives ♦ Cables

The End User Center of Competence performs comprehensive functionality testing in order to demonstrate compatibility of the MegaRAID product line. The listed components represent the interoperability guide for the direct attached storage ecosystem based on our findings. Testing consists of over 50 individual test cases specific to Enclosures, Drives, and Motherboards and includes RAID functionality across all supported RAID levels, basic enclosure SES functions (Drive Locate, Array locate, fan poling, temperature, power supply information, enclosure information), enclosure power cycles during IO and physical drive pulls
